## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 22 is objected to because of the following informalities:

Claim 22 recites a limitation "operable to" which is not a positive recitation.

Under MPEP 2111.04, "language that suggests or makes optional but does not require steps to be performed or does not limit a claim to a particular structure does not limit the scope of a claim limitation."

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claim 22 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Line 1, "A processor readable media for storing instructions" is nonstatutory functional descriptive material, because it is not capable of causing functional change in the computer. See, e.g., Warmerdam, 33F.3d at 1361, 31 USPQ2d at 1760.

Examiner recommends -- A computer readable medium for storing computer executable instructions to perform --.

***Allowable Subject Matter***

4. Claims 1-21 and 23-32 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach estimating frequency error based on a metric indicative of detected pilot power in specific combination as recited in claims 1, 10, 12, 19, 21, 23, 29, and 32.

***Conclusion***
